Proposed Plan of Research

Submit a 2-page proposal plan of research. It should include the following:

- **Title**: Use a descriptive title
- **Keywords**: significant words or items used in your project that which will be used as index entries
- **Hypothesis**: An unconfirmed explanation of the problem that needs to be further investigated to ascertain its validity. Decide what we wish to investigate, expressed as a hypothesis we want to test
- **Research Plan**
    - **Strategy**: Actions designed to achieve project goal(s)
    - **Methodology**: A set of practices, procedures, and rules needed to implement the strategy
    - **Control**: The approach used to monitor the plan, and test and verify your findings. Identify variables that can affect the hypothesis, and decide how much control we have over the variables
- **Anticipated Results/Findings**: State the expected outcomes of your project.
- **Statement Attesting to the Originality of the Research Proposal**. Please refer to Plagiarism Handout.
